Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5, and 10-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Shiotsuki et al. (5,450,473).

Regarding claims 1-3, Shiotsuki discloses a method and arrangement of effectively reducing signal strength measurement for handoff in cellular mobile communications system comprising:

establishing a predetermined connection authentication between the first wireless device and the second wireless device (see fig.1, elements 10, M1, M2, fig.3, element 20, fig.5, step 60 and its description)

measuring signal strength of the first device (see fig.1, element 22 and its description);

comparing the signal strength to a predetermined signal strength threshold value (see fig.5, step 66, 68, col.4, line 54-61 and its description);

measuring signal rate change of the first device (see fig.5, step 62 and its description);

comparing the signal rate change to a predetermined signal rate change threshold value (see fig.5, step 64, col.4, line 43-53 and its description);

Art Unit: 2683

connecting the first device to the second device if the predetermined connection authentication, signal strength threshold value, and signal rate change value are met (see abstract, fig.1 and its description).

Regarding claims 4-5, 10, 12-14 predetermined threshold and rate is a predetermined value therefore it is inherent that the predetermined value must be stored in a memory.

Allowable Subject Matter

3. Claims 6-9, 15-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to CongVan Tran whose telephone number is 571-272-7871. The examiner can normally be reached on Monday-Thursday.
